

The best way to protect our natural resources is to understand them on a watershed basis. Everyone lives in a watershed and a successful watershed partnership doesn't just happen. It takes a group of concerned citizens working together.

“We All Live Down Stream” Conservation Tour

**Sponsored by;
Washington Co. Soil & Water Conservation
Natural Resources Conservation Service
Purdue Extension-Washington Co.
Clean Water Indiana**

August 14, 2008, 5:00 pm – 8:00 pm

Reservations are required, call 883-3704

The tour will begin from the parking lot at Delaney Creek Park at 5 p.m. everyone will board the bus for a guided tour of several structures in the area. The tour will conclude at the “Boat Loft Restaurant” with a meal and power point presentation.

Program presenters:

David Hoar, SWCD chairman
Tyler Martindale, NRCS Area engineer-SE.
Chris Strange, Delaney Park Coordinator

Learn of county flooding problems before watershed structures were designed and built. And of the dedicated people living in watershed areas that serve on conservancy boards, help maintain financial records/budgets, oversee state inspections and schedule yearly maintenance to ensure they function as designed. Watersheds in Washington Co. are; Delaney, Elk Creek and Twin Rush, Muddy Fork, Lost River, and Stucker Fork. The Elk Creek watershed was the first watershed approved for construction in Indiana.

Mark you calendar and join us! August 14, 2008 at 5 pm
